

Application No. 09/711,567
Attorney's Docket No. 031221-058

85. (Twice Amended) A manufactured article that includes a first substrate surface, a second substrate surface and an adhesive layer interposed therebetween, wherein the first substrate surface comprises an elastomeric material and the adhesive layer comprises a metathesis polymer which was polymerized upon contact with a catalyst under normal ambient conditions without an exterior energy source.

90. (Twice Amended) A tire laminate comprising a tire carcass having an outer periphery surface, a tire tread having a bonding surface, and a metathesis polymer adhesive layer between the outer periphery surface of the tire carcass and the bonding surface of the tire tread, wherein the metathesis polymer adhesive layer was formed by polymerization upon contact with a catalyst under normal ambient conditions without an exterior energy source.
